PROJECT

Rental Room Finder

Rental Room Finder is a web-based platform that simplifies the process of finding and listing rental accommodations. It allows landlords to post detailed room listings with rent, location, amenities, and images. Renters can easily search, filter, and compare rooms based on their personal preferences. The platform includes user role-based dashboards for landlords, renters, and admins to manage their activities efficiently. Real-time booking requests and notifications enhance user interaction. With a clean interface and responsive design, the platform offers a smooth and accessible experience across all devices.

Technology :- HTML-5,CSS,Bootstrap,JavaScript,Node.js,MongoDB.

Weather-App

This Node.js-based Weather App provides real-time weather updates for any city using live API data. It displays temperature, and conditions in a clean, responsive interface. Users can search instantly and get dynamic weather details with ease.

Technology :- HTML-5,CSS,Bootstrap,JavaScript,Node.js
